## Splitting the Steps: Estimated mean from a grouped frequency table

## Question 1

| Weight <br> (in grams) | Frequency <br> (f) | Midpoint <br> (m) | Working out <br> (m×f) |
| :---: | :---: | :---: | :--- |
| $20 \leq w<30$ | 5 | 25 | $5 \times 25=$ |
| $30 \leq w<40$ | 7 | 35 | $7 \times 35=$ |
| $40 \leq w<50$ | 10 | 45 | $10 \times 45=$ |
| $50 \leq w<60$ | 6 | 55 | $6 \times 55=$ |
| Total |  |  |  |

a) Complete the working out
b) Fill in the totals at (1) and (2)
c) Calculate the estimated mean: (2) $\div$ (1) $=$ $\qquad$ $\div$ $\qquad$ $=$ $\qquad$
d) Round your answer to 1dp: $\qquad$

Question 2

| Distance <br> (in km) | Frequency <br> (f) | Midpoint <br> (m) | Working out <br> (m×f) |  |
| :---: | :---: | :---: | :---: | :---: |
| $0 \leq \mathrm{d}<12$ | 1 |  | $1 \times$ | $=$ |
| $12 \leq \mathrm{d}<24$ | 4 |  | $4 \times$ | $=$ |
| $24 \leq \mathrm{d}<36$ | 11 |  | $11 \times$ | $=$ |
| $36 \leq \mathrm{d}<42$ | 5 |  | $5 \times$ | $=$ |
| Total |  | $(1)$ |  |  |

a) Find the midpoints
b) Complete the working out
c) Fill in the totals at (1) and (2)
d) Calculate the estimated mean: (2) $\div(1)=$ $\qquad$ $\div$ $\qquad$ $=$ $\qquad$
e) Round your answer to 1dp: $\qquad$

Question 3

| Height of children <br> (in $\mathbf{c m}$ ) | Frequency <br> (f) | Midpoint <br> (m) | Working out <br> (m×f) |
| :---: | :---: | :---: | :---: |
| $110 \leq h<120$ | 2 |  | $\times$ |
| $120 \leq h<130$ | 8 |  | $\times$ |
| $130 \leq h<140$ | 4 |  | $\times$ |
| $140 \leq h<150$ | 1 |  | $\times$ |
| Total |  | $(1)$ |  |

a) Find the midpoints
b) Complete the working out
c) Fill in the totals at (1) and (2)
d) Calculate the estimated mean: (2) $\div$ (1) $=$ $\qquad$ $\div$ $\qquad$ $=$ $\qquad$
e) Round your answer to 1dp: $\qquad$

## Extension

Calculate the estimated mean from this table

| Goals <br> (per month) | Frequency <br> $\mathbf{( f )}$ | Midpoint <br> (m) | Working out <br> (m×f) |
| :---: | :---: | :---: | :---: |
| $0 \leq \mathrm{g}<5$ | 13 |  |  |
| $5 \leq g<10$ | 4 |  |  |
| $10 \leq g<15$ | 0 |  |  |
| $15 \leq g<20$ | 1 |  |  |
| Total |  |  |  |

## GCSE Questions

Q1. Anita picked 50 apples and weighed them. The results are summarised in the table below.

| Weight ( $w$ grams $)$ | Frequency |
| :---: | :---: |
| $60 \leq w<100$ | 13 |
| $100 \leq w<140$ | 20 |
| $140 \leq w<180$ | 11 |
| $180 \leq w<220$ | 6 |

Calculate an estimate of the mean weight of these apples.

Q2. One day, 50 people used the sports club.
This table shows a summary of the times they spent there.

| Time $(h$ minutes $)$ | Frequency |
| :---: | :---: |
| $0<h \leq 30$ | 5 |
| $30<h \leq 60$ | 9 |
| $60<h \leq 90$ | 20 |
| $90<h \leq 120$ | 10 |
| $1200<h \leq 150$ | 6 |

Calculate an estimate of the mean time spent at the club.
