

## Rounding Investigation

### Skills

- Complete a Venn diagram
- Round to one decimal place, two significant figures and nearest ten
- Recognise the similarities between types of rounding

### Instructions

Find at least two numbers to go in each section of the Venn diagram.

### Example:

4.51 rounds to 4.5 (1dp) and 4.5 (2sf), so 4.51 goes in the overlap between 2SF and 1DP
